

South Florida Water Management District
Geocache Site Application

To apply for a geocache site on South Florida Water Management District (District) land, please provide the requested information below. Please note that submitting this application does not constitute establishment of an official geocache site. Each applicant must receive an e-mail from the District Land Manager of the Region indicating approval before an official geocache site is established.

In submitting this application, I agree to the following:

I understand that the District's Land Stewardship Division Regional Land Manager must first approve this exact location before the geocache is placed.

The cache will be: located within close proximity of a designated trail, not placed within a wetland, and placed within a container with dimensions not to exceed 1 cubic foot, that will be located entirely above ground (no burying).

I will personally ensure that the site will be monitored monthly for signs of excessive use or disturbance and be kept clean of trash and debris.

I understand that the District's Land Stewardship Division will not be responsible for damage to the cache due to prescribed fire or any other management activity. The District reserves the right to remove the cache at any time without prior notice to the cache owner.

After one year from the date of approval, I will request an extension or relocation within the same management area or removal of the cache completely.

Name: _____

Address: _____

Address: _____

City: _____

State: _____

Zip Code: _____

E-mail: _____

Telephone: _____

I would like to establish a geocache site at the following coordinates on the

Management Area: _____

1. X-coordinate, Y-coordinate _____

For additional geocache requests at this site:

2. X-coordinate, Y-coordinate _____

3. X-coordinate, Y-coordinate _____

Additional Information about the location and geocache which may be helpful in responding to this request:
